

How To Register Your Atlas Panel

Step 1.

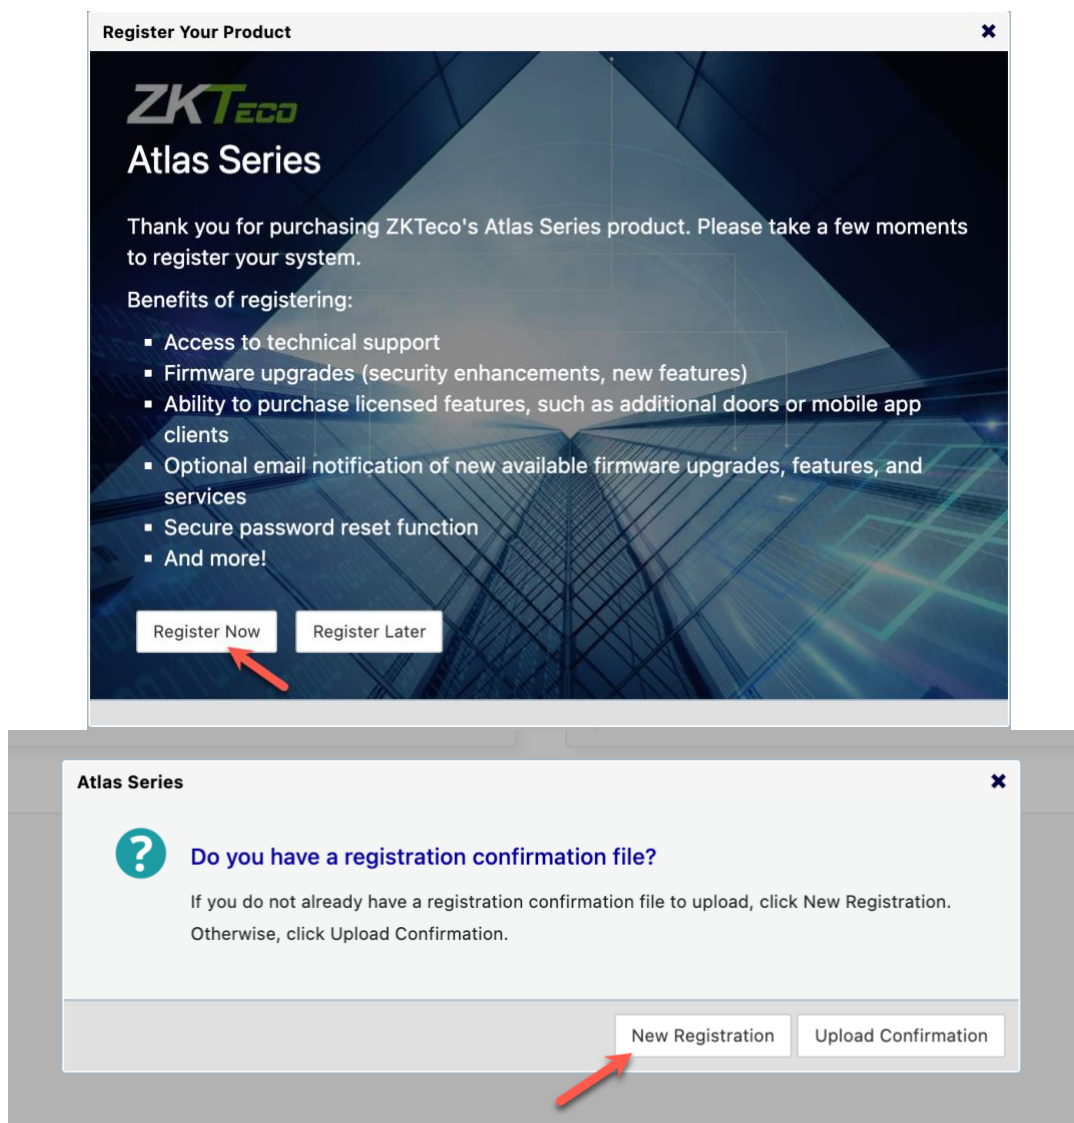

You will want to make sure your network & DNS settings are able to connect to the internet.

Go to Admin > Network and check your network settings are correct. If you're not sure of your network settings, open Command Prompt on your Windows PC and type in "ipconfig".

Step 2.

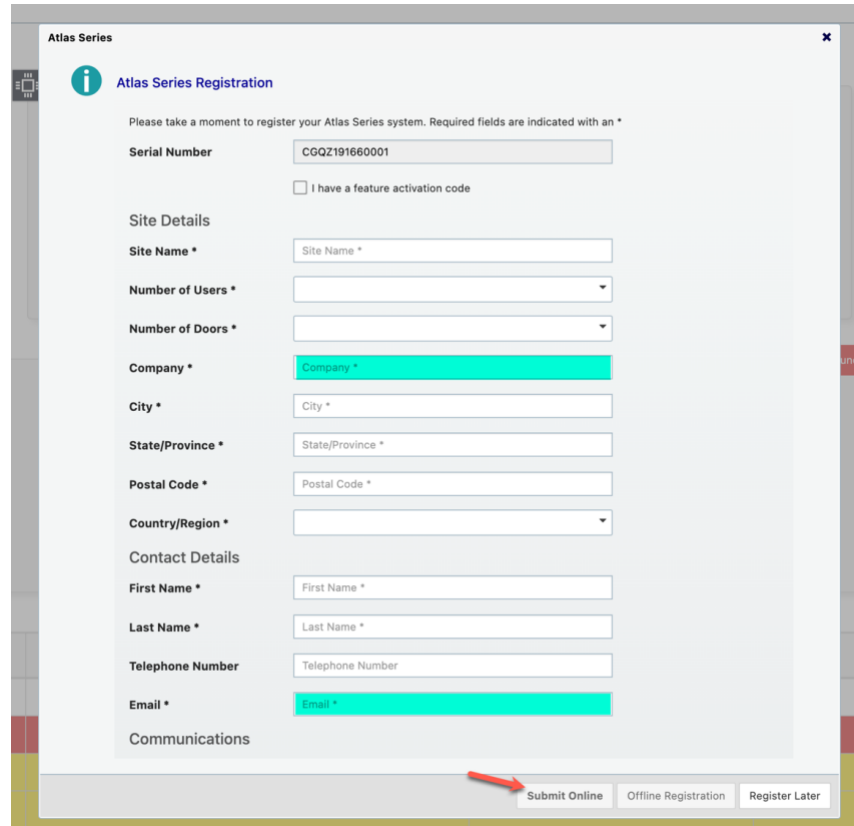

On the registration screen, click on “Register Now”. Then click on “New Registration”.

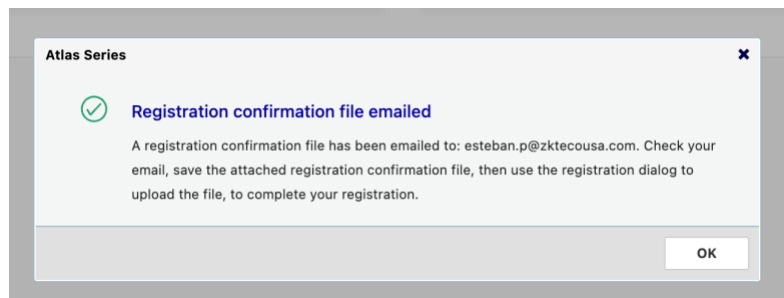

Step 4.

Fill out this information as accurately as possible and click on “Submit Online”.

- For Company Name, input the name of your own company, not the customer's company.
- For Email, input your company email so you may receive the registration file.

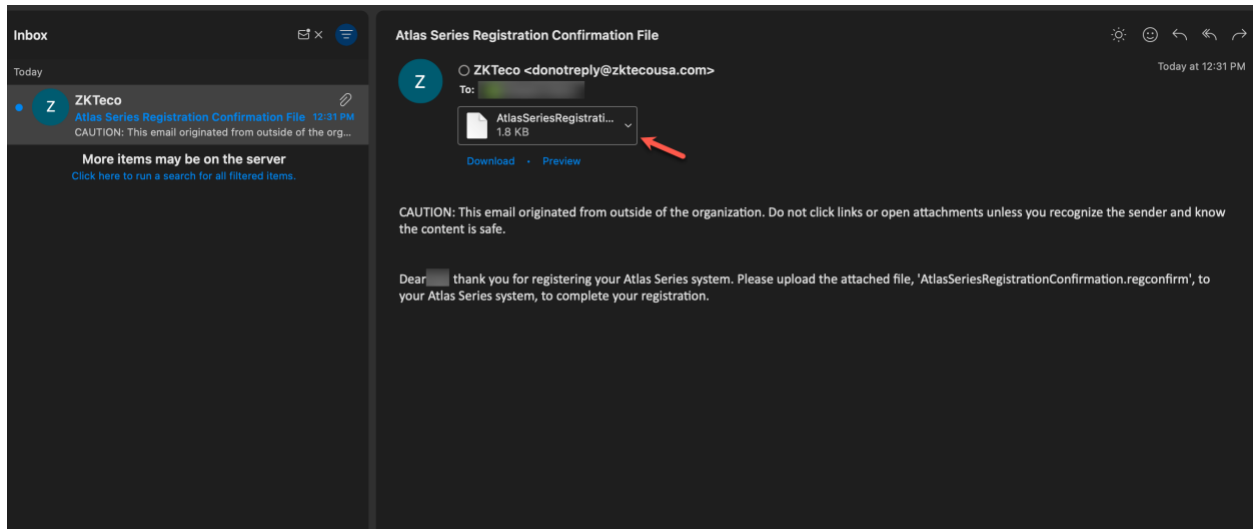

The image shows a software registration window titled "Atlas Series". It contains a form for "Atlas Series Registration". The form includes fields for "Serial Number" (CGQZ191660001), "Site Name", "Number of Users", "Number of Doors", "Company", "City", "State/Province", "Postal Code", "Country/Region", "First Name", "Last Name", "Telephone Number", and "Email". A red arrow points to the "Submit Online" button at the bottom right of the form.

The image shows a confirmation message window titled "Atlas Series". It contains a green checkmark icon and the text "Registration confirmation file emailed". Below this, it says: "A registration confirmation file has been emailed to: esteban.p@zktecousa.com. Check your email, save the attached registration confirmation file, then use the registration dialog to upload the file, to complete your registration." There is an "OK" button at the bottom right.

Step 5.

Check your email for the registration file and save it to your PC. Also check your junk folder in case it did not come to your direct inbox.

Step 6.

Back on the Atlas user interface, click on “Upload Confirmation” and select that file to upload it. After uploading it will show as successful.
